## Mouse Embryo Cryopreservation Kit

Contains a set of culture media, cryopreservation solution, and thawing solution for the cryopreservation and thawing of mouse embryos.

Procedures are provided for using the kit for *in vitro* fertilization / embryo culture, cryopreservation of the embryos, and thawing of the embryos.

Contains:

### For Cryopreservation

- |                                |          |        |       |
|--------------------------------|----------|--------|-------|
| • TYH Medium                   | 5 mL x 1 | KT-102 | \$657 |
| • mW Medium                    | 5 mL x 1 |        |       |
| • PB1 Solution                 | 5 mL x 1 |        |       |
| • 1M DMSO Solution             | 2 mL x 1 |        |       |
| • DAP213 Preservation Solution | 2 mL x 1 |        |       |

### For Thawing

- |                          |          |
|--------------------------|----------|
| • mW Medium              | 5 mL x 5 |
| • 0.25M Sucrose Solution | 2 mL x 5 |

Kit sufficient for freezing ~8,000 embryos.
